Subject: Dump the Mumps and Screw the Flu campaign

Dear Ms. Sausser,

My name is Ava Turner, and I have a potential story idea you might be interested in regarding the mumps outbreak on the College of Charleston campus.

Students will have the opportunity of getting vaccinated on the CofC campus. We want to make the process more convenient and accessible for the safety of our students. Student Health Services at CofC, is launching an informational campaign about vaccinations that are specific for protecting students from MMR, T-Dap and Meningitis.

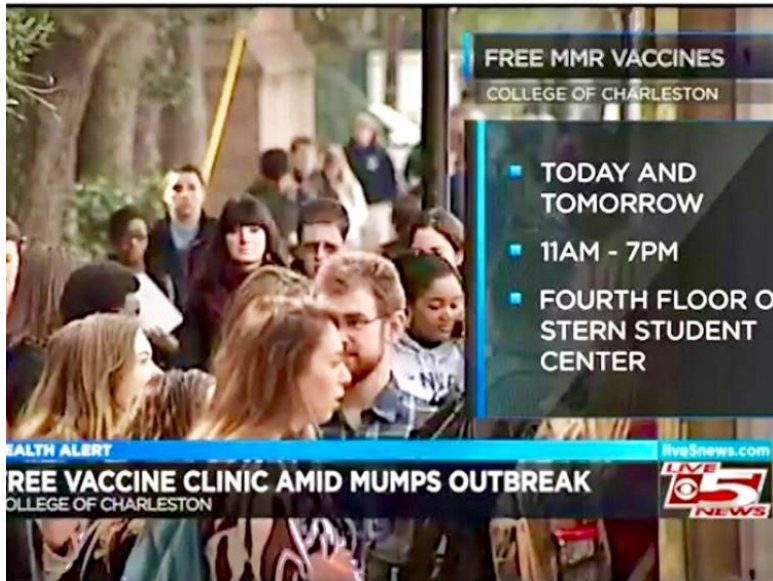

We want the community to know that the College is trying to protect its students from disease and promote the opportunity of staying healthy by getting the vaccine.

Thank you for your time, If you need more info please contact me.

Sincerely,
Ava
